ABOUT ME

Passionate, cross-functional, creative and results-driven with over nine years of tech marketing experience across Graphic design, Videography, 3D modeling, Front-End Web developer, Web Designer and UI design.

WORK EXPERIENCE

MARKETING MANAGER | 2013-2015
WinWin Computer Shop | Jagodina

This was my first job where I acquired skills in conversing with people, elevated my vocabulary to a higher level, stayed current with all emerging technologies, and had the opportunity to meet many influential individuals who would later impact my career.
Worked as a salesperson, interacted with private individuals, engaged in store space design, managed financial reports, and sent out reports.

SENIOR GRAPHIC DESIGNER | 2015-2019
Foto Milan / Jagodina

I worked at this company for five years, serving as the lead graphic designer. I handled video editing, captured various events, and during my years here, I elevated my knowledge in design sensibility, catered to various client preferences, and significantly honed my skills to an even higher level.

3D MODELER AND INDUSTRIAL DESIGNER | 2019-2021
BARK/ Jagodina

Bark was the company where I first encountered a new chapter in my career, and I learned many new aspects of industrial design and 3D modeling. The owner was an individual with exceptional intelligence, and he taught me a lot, from industrial to graphic design. He pushed me to think creatively and challenged me to use every last bit of my brainpower. I also learned to be even more disciplined.

UI DESIGNER, FRONT END WEB DEVELOPER, WEB DESIGN, VIDEO EDITOR | 2022-

YouTestMe/ Belgrade

And finally, my first IT company, where I leveraged all the skills I had been accumulating over the years. I started as a Video Editor intern, and within five days, I received a job offer. Later, I transitioned to website maintenance and design and subsequently moved on to working on the user interface (UI) for applications. So, now I handle all of these responsibilities.
